About Me

I aim to begin my career by utilizing strong problem-solving abilities and attention to detail to develop high-quality software. Dedicated to continuous learning, teamwork, and building impactful technologies that support organizational growth.

Projects

Airline Reservation System

- The Airline Reservation System manages flight bookings, cancellations, passenger records, and seat availability.
- It includes a user-friendly interface for passengers and an admin panel for managing flights, schedules, fares, and system operations.
- **Tech Stack:** Spring Boot, HTML, CSS, JavaScript, MySQL

Farming Assistance

- The Farming Assistance System is a web-based platform that enables users to purchase fertilizers and pesticides online with ease.
- It features real-time weather updates on the homepage to help farmers make informed agricultural decisions.
- The system enhances accessibility to farming essentials and supports better crop management.
- **Tech Stack:** JSP, HTML, CSS, JavaScript, PostgreSQL

SQL Query Validation

- This project validates user-entered SQL queries. It shows "Correct" for valid queries and "Wrong" for incorrect ones. It helps users learn SQL by providing instant feedback.
- It provides a safe environment to practice SQL without affecting any real database. The tool instantly highlights mistakes, helping learners improve their query-writing skills faster.
- **Tech Stack:** Flask, HTML, CSS, JavaScript
